PROFESSIONAL SUMMARY

Software Engineer with experience in Manual Testing and strong knowledge of Python, React, OpenAI API integration, and Generative AI concepts. Skilled in Functional Testing, Regression Testing, API Testing, Prompt Engineering, and web application development. Hands-on experience in developing AI chatbot applications using React, Python, OpenAI API, and PostgreSQL. Familiar with Agile methodology, SDLC, STLC, frontend-backend integration, and Large Language Model (LLM) fundamentals.

TECHNICAL SKILLS

Programming: Python, JavaScript

Frontend Technologies: React, HTML, CSS

Generative AI: Prompt Engineering, LLM Basics, OpenAI API Basics, AI Agents, RAG, Generative AI Fundamentals

Testing: Manual Testing, Functional Testing, Regression Testing, Smoke Testing, API Testing

Database: MySQL, PostgreSQL

Tools: GitHub, Postman, Jupyter Notebook, VS Code, pgAdmin

Concepts: SDLC, STLC, Agile Methodology, REST API Basics, Frontend-Backend Integration

PROFESSIONAL EXPERIENCE

Capgemini Technology Services India Limited

Software Engineer / Analyst

 March 2023 – Feb 2024

- Performed Functional, Regression, and Smoke Testing.
 - Designed and executed test cases.
 - Identified and tracked software defects.
 - Worked in an Agile team environment.
 - Collaborated with development teams to ensure software quality and defect resolution.
-

GENERATIVE AI INTERNSHIP

Generative AI Intern

- Learned Generative AI concepts and Large Language Model (LLM) fundamentals.
 - Worked on Prompt Engineering techniques and OpenAI API basics.
 - Developed AI chatbot applications using Python and React.
 - Used PostgreSQL and pgAdmin for database management and data handling.
 - Explored real-world AI use cases and chatbot workflows.
 - Improved understanding of AI response generation and LLM interaction systems.
-

PROJECTS

AI Chatbot using React & OpenAI API

- Developed an AI chatbot application using React and OpenAI API.
- Built responsive frontend UI and chatbot interface using React.
- Integrated OpenAI API for generating AI-based responses.
- Implemented user authentication and chat session management features.
- Used PostgreSQL database integration for storing chat history and user data.
- Managed database operations using pgAdmin.
- Worked on frontend-backend integration and REST API handling.
- Improved understanding of Generative AI workflows and LLM interaction.

AI-Enabled Shopping Cart Web Application

- Developed a shopping cart application using Python and React.
 - Built responsive frontend UI for product browsing and cart management.
 - Implemented AI-based product search to display product details and pricing based on user queries.
 - Implemented user authentication and cart management features.
 - Worked on backend logic and database operations.
 - Improved understanding of web application development.
-

EDUCATION

B.Tech – Electronics and Communication Engineering

Sri Indu College of Engineering and Technology | 2022
